Kia Ora Whānau

Welcome to Term 3. This will be another exciting term including Electives and Te Wiki o te Reo Māori. We look forward to lots of designing and creating this term. Thank you for your support in keeping Pokemon cards at home. We loved spending time with you celebrating your children at interviews in Term 2. Please contact us if you have any queries.

WHAT'S HAPPENING THIS TERM

Seesaw

Throughout Term 3 we will be reporting on Reading and Maths. These posts will be a real-time report with something that your child can do and is working on in these subjects. We will also be posting on other topics throughout the term. We encourage you to like and comment on your child's posts - they love seeing your comments!

Electives

Electives are back! Every student will get the opportunity to immerse themselves in an activity of interest. Recreational, arts and crafts, the list goes on. Electives will run during the middle block each Wednesday from weeks 2-6. An elective celebration will take place in week 7 to show off their learning. Bring it on Ngāhere!

EPRO8

EPRO8 is an exciting challenge where children get work in teams to design and create machines and object to meet set objectives. They do this by joining together metal rods and linking up moving parts like gears. The top 3 teams from our in school event will compete against other schools.

Minecraft

We are very excited to introduce Minecraft this term. For those few not in the know, Minecraft is basically digital Lego online. It is an amazing tool to encourage story telling, it's awesome for math, coding, building, farming and very fun to play.

Design Technology

During the second half of Term 3, Ngāhere students will get the opportunity to combine their learning of māori kupu, and design skills. They will follow the design process to create a game that engages players in an immersive Te Reo experience. Stay tuned to see what is created.

Science

This term we are going to be learning about States of Matter. All matter exists in three main states; solid, liquid, or gas. We will look at the properties of these three states. We will explore whether matter can change between these states. Can a liquid become a solid or a gas?
